

HOWEVER YOU ROLL THE DICE,

our Full Material Solutions
will cover ALL your needs!

tungaloy.com
ntkcuttingtools.com

Welcome to the Powerhouse of Precision: Tungaloy + NTK Highlights!

Unveil the epitome of innovation and expertise. Tungaloy and NTK, a dynamic alliance, form a powerhouse that goes beyond expectations. Together, we redefine the landscape as a comprehensive full material supplier, offering solutions tailored to every material type.

At the core of our excellence lies cutting-edge manufacturing for PVD, CVD, CBN, PCD, Ceramics, and Cermet inserts, covering all machining needs. This union is not just arithmetic; it's an equation where $1+1>2$, showcasing that the whole is truly greater than the sum of its parts.

*However you roll the dice,
our full material solutions will
cover all your needs!*

CVD GRADES

T9200 P M K

CVD grade series with outstanding productivity, especially for steel turning

Nearly unbreakable CVD series for improved machining efficiency

APPLICATION AREA **P**

T6200 M

Highly reliable CVD grade **series** for high-speed stainless steel turning

Complete grade line up for stainless steel turning

T500 K

Most optimal CVD grade **series** for high speed machining of cast iron

The thickest coating layer of all Tungaloy's CVD grades ever

APPLICATION AREA M

APPLICATION AREA K

PVD GRADES

AH6200 **M**

Highly reliable PVD grade
series for light and heavy
interrupted stainless steel
turning

Complete grade lineup for stainless steel turning

APPLICATION AREA **M**

DMC drilling head for DrillMeister

AH9130

The latest PVD grade developed specifically for hole making applications

A good combination of wear and fracture resistance enhances the grade's tool life and wear prediction.

LNMU insert for AddDoFeed

AH3225

P M

A highly reliable PVD grade for milling operations

Eliminates coating delamination and micro edge-chipping while impeding the progression of normal flank wear, providing long and predictable tool life in steel milling operations.

APPLICATION AREA

P
M
K
S
H

APPLICATION AREA

PVD GRADES MINIATURE

SH7025

P M

Superior surface quality in small part machining is achieved with a unique columnar-structured TiCN coating and multilayered TiAlN coating

Superior surface quality and process security in small part machining

APPLICATION AREA

QGM / QGS inserts for AddForceCut

AH7025

Dedicated PVD grade for grooving applications featuring a good balance of wear and chipping resistance.

AH7025 uses the world's first coating technology of a nano-scale multi-layered AlTiN PVD coating with high Al content.

APPLICATION AREA

ZM3/TM4

General-purpose PVD grades suitable for a wide range of machining applications on Swiss lathes

Featuring both excellent adhesion and wear resistance

APPLICATION AREA

PVD GRADES MINIATURE

NTK650 S

Outstanding productive PVD grades for machining Ni based components

Latest HiPIMS coating technology for Improvement of surface-smoothness and suppression of imperfections in film

APPLICATION AREA S

ST4 **M**

Dedicated PVD grade for stainless steel machining with high hardness and oxidation resistance

Outstanding tool life with efficient machining of difficult to cut stainless steels and steels

DM4/DT4 **M** **S**

High productive PVD grades for heat resistant alloys and titanium alloys

Featuring an unparalleled stable machining even during high temperature machining conditions

APPLICATION AREA **M**

CBN GRADES

BXA10 **H**

CBN Grade for continuous
hardened steel turning

Incredible reliability with excellent wear resistance

APPLICATION AREA **H**

BXA20 H

Versatile **CBN** grade for continuous to light interrupted hardened steel turning

Enables stable machining at low to medium cutting speed

BR35F H

Efficient **CBN** grade for heavy interrupted hardened steel turning

Incredible reliability with high fracture resistance

HARDBREAKER SERIES

CBN chipbreaker series for hardened steel

For removal of carburized layer

Breaker shape with excellent chipping resistance in deep cuts

For removal of carburized layer

- Reliable chip restraint over a wide cutting area
- Breaker shape for low cutting resistance and crater wear

For high feed finishing

- Breaker shape for excellent chip control
- Edge prep to prevent catastrophic failure

For precision finishing

Breaker shape suitable for precision finishing

PCD GRADES

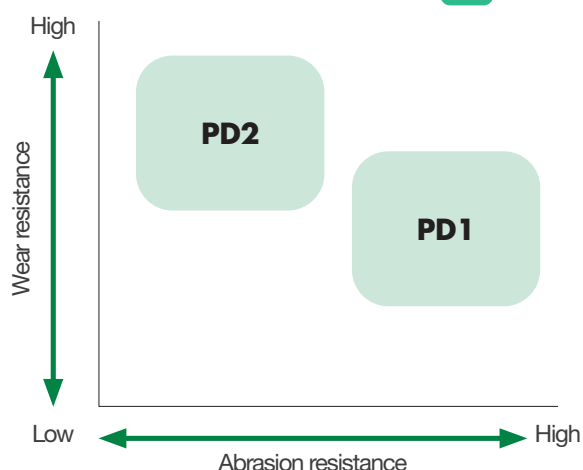

PD1/ PD2 **N**

Excellent durable **PCD** grades with sharp cutting edge and **increased chipping resistance for higher performance**

3D chipbreaker selection exhibiting increased sharpness and excellent adhesion resistance

APPLICATION AREA **N**

DX110 N

An extremely wear-resistant PCD grade, suitable for finishing aluminum and copper alloys

featuring strongly-bonded diamond grains that prevents the grains from breaking off during machining

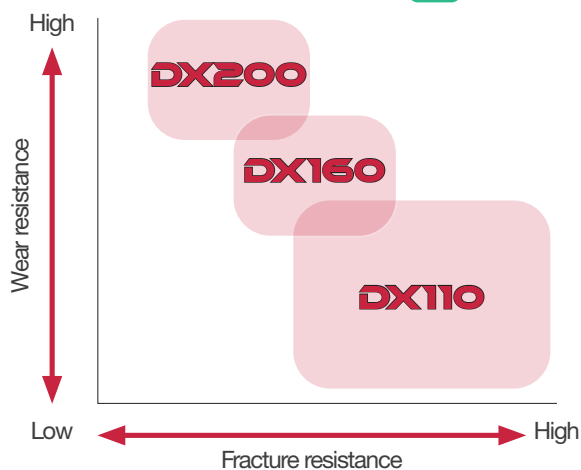

DX200 N

100% diamond grade perfect for machining tungsten carbide and other superhard non-ferrous metals

Featuring a sharp cutting edge that provides excellent surface finish

APPLICATION AREA N

NS Chipbreaker

PCD inserts with **3D chipbreaker** for excellent chip control, suitable for both roughing and finishing operations. Available for **DX110** and **DX160** grade series

CERAMICS GRADES

JX1/JX3 **S**

BIDEMICS Line a **NEW ERA** of turning for Heat resistant alloys with ultra-high productivity

Roughing to semi-finishing of heat resistant alloys with higher quality and longer tool life than whisker ceramics

APPLICATION AREA **S**

TURNING - WET

SX3 S

First recommendation for heat resistant alloys machining for **high-speed turning and milling with stable performance**

Machines wide range of conditions in materials from the commonly used heat resistant alloys like Inconel 718 to the newer generation of materials like Rene

SX9 S

Excellent Ceramic grade featuring **superb notch and flank wear resistant**

Best grade for roughing heat resistant alloys like Inconel 718 with scale

APPLICATION AREA S

TURNING - WET

APPLICATION AREA S

MILLING - DRY

CERAMICS GRADES

SX6 **K**

First recommendation for **rough** turning and milling cast iron

Ceramic grades series with outstanding boundary wear resistance and thermal shock resistance

APPLICATION AREA **K** Cast Iron
Ductile Cast Iron

HC1/HW2 **K**

Unparalleled ceramic series for finishing gray cast iron

High-speed performance is achievable with the thermally and chemically stable alumina ceramic blend

HC2 **K**

Multi-purpose grade capable of machining gray cast iron and ductile cast iron

Excellent quality for finish application and to be compatible with Wet condition.

APPLICATION AREA **K** Cast Iron DRY

APPLICATION AREA **K** Ductile Cast Iron WET

CER MET GRADES

NS9530 **P**

Versatile cermet grade with
incredible fracture and wear
resistance

Provides long tool life and excellent surface
appearance in finishing to medium cutting of
steels.

APPLICATION AREA **P**

GT9530 **P**

Coated cermet grade with **premium coating** demonstrates exceptional **wear resistance**

Provides remarkable performance in finishing of steels during high speed machining.

AT9530 **P**

Coated cermet grade with **excellent wear resistance** in high-speed finishing

The 1st recommendation for machining alloy steel due to its outstanding wear resistance.

Cermet basic chipbreaker series for steel

NEGATIVE TYPE INSERTS

For precision finishing

The sharp cutting edge and raised projection near the corner contribute to excellent chip control at very small depths of cut and low feeds.

For finishing

The dimple structure decreases the contact area between the insert surface and chips, resulting in significant reduction of heat occurrence.

For finishing to medium cutting

The sharp cutting edge allows excellent chip control when machining shaft type components.

ADD^{ULTI}MTURN

THE ULTIMATE TOOL FOR MULTIPLICITY

*Front Turning, Back Turning, Profiling,
and Face Turning, with **ONE SINGLE TOOL***

6C-TOMG 80° NEGATIVE INSERT 6 CUTTING EDGES

Unique concave-convex shape on the bottom of the insert provides outstanding clamping rigidity and securely locks the insert in place ensuring tool reliability when turning in any direction.

Cutting edge with a low approach angle allows high feed machining.

Also effective for removing burrs.

The positive triangular insert features 86° nose angle for enhanced cutting edge robustness.

The positive triangular insert has integrated wipers, which provide high surface finish quality at significantly increased feed rate.

Two types of double-sided negative inserts are available with 80° or 35° nose angles.

AddMultiTurn can combine multiple processes in a single operation, maximizing machine utilization and productivity.

6V-TOMG 35° NEGATIVE INSERT 6 CUTTING EDGES

3C-TCMT 86° POSITIVE INSERT 3 CUTTING EDGES

Y-AXIS TOOL HOLDER SERIES

FOR SWISS TYPE MACHINES

A turning point to increase your productivity

By using the Y-axis instead of the conventional X-axis the tool can direct the cutting force in the longitudinal axis of the holder, the strongest part of the tool. This provides more security during the cutting process.

By simply rotating the tool along the axis, the cutting edge angle can be set to an optimum angle that enables the most effective entry into the cut.

The same tool can be used when turning either from the end of the part towards the chuck or turning away from the chuck to the end of the part.

Anti-vibration bars

Steel shank

PSC adapters

BOREMEISTER

VIBRATION-FREE SOLUTION FOR DEEP HOLE BORING

High-stability and precision

Ultimate solution to conquer tool overhang challenges, chattering, noise and short tool life of up to 10xD.

Exchangeable head boring tool system with serrated interfaces for high precision and high rigidity indexing.

Through-coolant capability allows smooth chip evacuation in deep boring operations of up to 10xD.

PSC holders are also available, allowing coupling with a range of machine tools.

Dedicated setting device allows quick and accurate center height settings of the boring bar.

A wide range of boring heads are available, providing high parts quality in various boring operations

AddInternalCut, TungCut, and AddForceCut heads

e-catalog

INNOVATIVE MODULAR HEAD SYSTEM FOR SWISS MACHINES

*Flexibility and productivity
in your machining operations*

MODUM^{INI}TURN

Modularity and productivity with a wide selection of turning, grooving and threading heads

Quick tool change and setup is possible with simple exchanges of turning heads.

Unique coupling method provides stable head-shank connection and secure insert edge position for good repeatability and accuracy.

Positioning accuracy for the same insert: $\pm 5 \mu\text{m}$

New round shank toolholders for back machining

QC10, QC12 & QC16 type series

ModuMiniTurn offers precision internal coolant delivery, which improves chip control and tool life.

Creates a near-flat hole bottom

Creates a flat hole bottom with excellent chip control, thanks to its unique chipbreaker

e-catalog

e-catalog

TINY^{INI}MTURN

MINIATURE SOLID BORING TOOLS FOR HIGH ACCURACY

Efficiency and profitability to your small boring operations as small as $\varnothing 0.6$ mm

New **SH725** insert grade provides a good combination of wear and fracture resistance, ensuring long tool life and wear prediction.

Expanded indexable type holders, and inserts with 3D chip breaker for better chip control.

Ideal for machining extremely small diameter bores in a wide range of materials.

Ingenious through-coolant sleeve design optimally directs 4 streams of coolant jets close to the cutting zone, providing long tool life, controlled chips formation and evacuation for better part quality.

*Available with a wide selection of heads
for boring, profiling, chamfering,
threading and grooving*

*Additionally offered with CBN **BX310**
uncoated grade, suitable for bore
diameters as small as 2.8 mm.*

Available in three minimum bore diameters (DMIN): 2.8,
4 and 5 mm, and in 2xD and 3xD tool lengths
