

## Safety Data Sheet (SDS)

Date of Issue: 1<sup>st</sup> September, 2005

Date Revised: 23<sup>rd</sup> May, 2023

### 1. Identification of the Substance and of the Company

**Product Identifier:**

Ceramic (include the coated or surface treated Ceramic)

**Supplier Information:**

Company Name: NTK CUTTING TOOLS .CO., LTD.  
 Address: 2808 Iwasaki, Komaki-shi, Aichi, Japan <485-8510>  
 Telephone Number: +81-568-76-1270  
 FAX Number: +81-568-76-1288  
 Emergency Telephone : +81-568-76-1270

**Recommended Use of the Ceramic**

Cutting and drilling tools for metallic materials

**Restrictions on Use of the Ceramic**

Do not use for other than the specified purpose

**Attention to the Phase/State of the Ceramic**

- Ceramic as solid state like cutting tools is chemically stable and safe at explosive, flammable, combustible, pyrophoric, water-reactive, and oxidizability under normal environment.
- Ceramic is safe for use as the cutting tools (grinding, machining, rolling for metals) under normal condition.
- This SDS informs about the dust, fume or vapor which occur from Ceramic producing process such as raw material powder handling and grinding.

### 2. Hazard Identification

**The GHS Classification**

Some data (such as the burning rate test data, etc.) for the dust, fume or vapor which occur from Ceramic producing process are unavailable. Therefore, they are not be classified by GHS.

In here, GHS classification of the each metallic ingredients (cobalt, nickel and chromium) for composing the Ceramic can be disclosed. In addition, other hazards and harmful effects (for health, environment, physical and chemical) which are not listed are unclassifiable or non-applicable by GHS.

GHS classification for the hazards of cobalt alone in below,  
 (When cobalt is included as ingredients of Ceramic.)

Health Hazard	<ul style="list-style-type: none"> <li>• Acute toxicity (oral)</li> <li>• Acute toxicity (inhaled: dust, mist)</li> <li>• Serious eye damage / eye irritation</li> <li>• Respiratory sensitization</li> <li>• Skin sensitization</li> <li>• Carcinogenicity</li> <li>• Reproductive toxicity</li> <li>• Specific target organ toxicity (Single exposure)</li> <li>• Specific target organ toxicity (Repeated exposure)</li> </ul>	Category4 Category1 Category2B Category1A Category1A Category2 Category1B Category1 (Respiratory) Category1 (Respiratory, Heart, Thyroid, Blood)
---------------	---	--

Environmental Hazard:	<ul style="list-style-type: none"> <li>• Hazardous to the aquatic environment – prolonged (Chronic hazard)</li> <li>• Hazardous to the aquatic environment – repeated (Acute hazard)</li> </ul>	<p>Category1</p> <p>Category1</p>
-----------------------	---	-----------------------------------

GHS classification for the hazards of nickel alone in below,  
(When nickel is included as ingredients of Ceramic.)

Health Hazard	<ul style="list-style-type: none"> <li>• Respiratory sensitization</li> <li>• Skin sensitization</li> <li>• Carcinogenicity</li> <li>• Specific target organ toxicity (Single exposure)</li> <li>• Specific target organ toxicity (Repeated exposure)</li> </ul>	<p>Category1</p> <p>Category1</p> <p>Category2</p> <p>Category1 (Respiratory tract irritation)</p> <p>Category1 (Respiratory)</p>
Environmental Hazard:	<ul style="list-style-type: none"> <li>• Hazardous to the aquatic environment – prolonged (Chronic hazard)</li> </ul>	<p>Category4</p>

GHS classification for the hazards of chromium alone in below,  
(When chromium is included as ingredients of Ceramic.)

Health Hazard	<ul style="list-style-type: none"> <li>• Serious eye damage</li> <li>• Respiratory sensitization</li> <li>• Skin sensitization</li> <li>• Germ cell mutagenicity</li> <li>• Specific target organ toxicity (Single exposure)</li> <li>• Specific target organ toxicity (Repeated exposure)</li> </ul>	<p>Category2B</p> <p>Category1</p> <p>Category1</p> <p>Category2</p> <p>Category2 (Respiratory tract irritation)</p> <p>Category3 (Respiratory)</p>
---------------	---	---

**GHS Label Elements**

GHS label elements of the each metallic ingredients (cobalt, nickel and chromium) for composing the Ceramic can be disclosed in below.

	Cobalt	Nickel	Chromium
Hazard Pictograms :			
Signal Words :	<p>Danger</p>		
Hazard Statements :	<ul style="list-style-type: none"> <li>• Risk of causing allergies, asthma or breathing difficulties if inhaled.</li> <li>• Risk of causing an allergic skin reaction.</li> <li>• May cause cancer.</li> <li>• May cause adverse effects on fertility or</li> </ul>	<ul style="list-style-type: none"> <li>• Risk of causing allergies, asthma or breathing difficulties if inhaled.</li> <li>• Risk of causing an allergic skin reaction.</li> <li>• May cause cancer.</li> <li>• Respiratory and kidney disorders</li> </ul>	<ul style="list-style-type: none"> <li>• Risk of causing allergies, asthma or breathing difficulties if inhaled.</li> <li>• Risk of causing an allergic skin reaction.</li> <li>• Suspected of causing genetic disease</li> </ul>

If irritation persists, get medical advice/attention.</li> <li>• If a large amount of dust is swallowed, get medical advice/attention after ingesting plenty of water to dilute.</li> </ul> <p><b>【Storage】</b></p> <ul style="list-style-type: none"> <li>• Avoid sudden changes of temperature and high humidity for storage.</li> </ul> <p><b>【Disposal】</b></p> <ul style="list-style-type: none"> <li>• Dispose of contents/container to an approved waste disposal plant under the laws.</li> </ul>		

\*For safety instructions, refer to the Japan Cutting & Wear-resistant Tool Association website (<http://www.jta-tool.jp/>) .

### 3. Hazard Identification

#### Important Hazards and Effects

- Danger: • Ceramics is nonflammable in solid form and there is no risk of fire. However, dusts resulting from cutting and grinding may be pyrophoric or explosive.
- Hazard: • Not reported on flash point, ignition point, explosive limits, etc.
- If dusts resulting from cutting and grinding are on skin or in eyes, irritation may occur.
- Environmental Effects: • Not reported on Ceramics

### 4. Composition/Information on Ingredients

- Distinction between substance and mixture: Mixture
  - Chemical name or general name: Ceramic
- Ceramic may be coated or surface treated with the following substances.  
 AlN, Al<sub>2</sub>O<sub>3</sub>, TiC, TiCN, TiN, (Al,Ti)N, (Al,Cr)N, (Ti,Al,Cr)N, (Ti,Al,V)N, Cr<sub>3</sub>C<sub>2</sub>, CrN, (Ti,Si)N, (Ti,Zr)N, WC, VC, C (Diamond, DLC)
- Ingredients and concentration or concentration range (composition) of the Ceramic

Ingredient	Chemical Formula	CAS No	Official Number of Law for PRTR	Official Number of Industrial Safety and Health Law	Composition mass%
Aluminum oxide	Al <sub>2</sub> O <sub>3</sub>	1344-28-1	N/A	Appendix 9-189	0-100
Zirconium oxide	ZrO <sub>2</sub>	1314-23-4	N/A	Appendix 9-313	0-15
Zirconium Carbide	ZrC	12070-14-3	N/A	N/A	0-10
Ytterbium oxide	Yb <sub>2</sub> O <sub>3</sub>	1314-37-0	N/A	N/A	0-15
Yttrium oxide	Y <sub>2</sub> O <sub>3</sub>	1314-36-9	N/A	Appendix 9-54	0-5
Dysprosium Oxide	Dy <sub>2</sub> O <sub>3</sub>	1308-87-8	N/A	N/A	0-5
Magnesium oxide	MgO	1309-48-4	N/A	N/A	0-5
Chromium oxide	Cr <sub>2</sub> O <sub>3</sub>	1308-38-9	Class 1:87	Appendix 9-142	0-1
Cerium oxide	CeO <sub>2</sub>	1306-38-3	N/A	N/A	0-5
Lanthanum Oxide	La <sub>2</sub> O <sub>3</sub>	1312-81-8	N/A	N/A	0-5
Silicon carbide	SiC	409-21-2	Class 1:667	Appendix 9-336	0-40
Aluminum nitride	AlN	24304-00-5	N/A	N/A	0-20
Silicon nitride	Si <sub>3</sub> N <sub>4</sub>	12033-89-5	N/A	N/A	0-100
Titanium nitride	TiN	25583-20-4	N/A	N/A	0-30
Cobalt	Co	7440-48-4	Class 1:132	Appendix 9-172	0-0.5
Cobalt oxide	Co <sub>3</sub> O <sub>4</sub>	1308-06-1	Class 1:132		
Nickel	Ni	7440-02-0	Class 1:308	Appendix 9-418	0-0.5
Nickel oxide	NiO	1313-99-1	Class 1:309		
Tungsten Carbide	WC	12070-12-1	N/A	N/A	0-85
Tantalum carbide	TaC	12070-06-3	N/A	N/A	0-20
Niobium carbide	NbC	12069-94-2	N/A	N/A	0-20
Titanium carbide	TiC	12070-08-5	N/A	N/A	0-75
Titanium carbonitride	TiCN	N/A	N/A	N/A	0-75

\*For the details regarding the content of the designated chemical material such as cobalt, nickel and chromium (effective digit: 2), please contact to the above supplier.

\*Even if the cemented carbide do not contain cobalt, nickel, chromium as an active ingredient may include cobalt, nickel, chromium as an impurity.

## 5. First-Aid Measures

### If Inhaled

- If the high concentration of dust is inhaled or respiratory symptoms (coughs, gasping, shortness of breath, etc.) are experienced, move to fresh air and take a rest with posture easy to breathe. If breathing difficulties occur, administer oxygen inhalation. If breathing has stopped, immediately administer artificial respiration and get medical advice/attention.
- If irritation or rash persists, get medical advice and attention.

### If on Skin

- If dust is contacted with skin, take off contaminated clothing and rinse the affected area with soapy water thoroughly. If irritation or rash persists, get medical advice/attention.

### If in Eyes

- If dust is in eyes, immediately wash away with clean water (remove the contact lenses if possible). If irritation persists, get medical advice/attention.

### If Swallowed

- If a large amount of dust is swallowed, get medical advice/attention after ingesting plenty of water to dilute.

## 6. Fire-Fighting Measures

### Suitable Extinguishing Media and Unsuitable Extinguishing Media

- To extinguish the fire of dust, use dry sand, expanded vermiculite, dilatable perlite, ABC type (general, oil, electric fire) powder extinguishers or water (no water allowed for the dust containing cut powders of light metal such as magnesium and aluminum).

### Special Protective Equipment and Emergency Procedures for Fire-Fighters

- In fighting a fire, wear a protective clothing, dust-proof respirator or respiratory protective equipment.

## 7. Accidental Release Measures

### Personal Precautions, Protective Equipment, and Emergency Procedures

- It is recommended that someone who cleans dust should wear clothing and respiratory protective equipment to minimize exposure.

### Environmental Precautions

- Dispose of dust as industrial wastes and prevent release in water systems.

### Containment and Cleanup Methods and Equipment

- If there is dust which occur from Ceramic producing process, isolate the area and remove with a cleaner equipped with a filter which can take up fine particles very efficiently. If appropriate removing methods are not available, sweep with water sprayers or wet mops.

## 8. Handling and Storage

### Handling

#### ■ Technical Measures

- Ceramic is a stable substance and has little influence on health, but if it contacts dust or grinding liquid containing cobalt or nickel for a long time or repeatedly, rough skin may occur.
- If the disperse of dust containing cobalt or nickel is concerned, provide local exhaust ventilation and use personal protective equipment to minimize exposure to human body.

#### ■ Precautions for Safe Handling

- Obtain safety instructions before use.
- Do not handle until all safety precautions have been read and understood.

#### ■ Contact Avoidance

- Take measures described in "Exposure Controls/Personal Protection."
- Do not breathe dust, fume or vapor.
- Do not eat, drink or smoke in handling area.

■ **Hygiene measures**

- Wash skin thoroughly after handling.
- Do not release into the environment.

**Storage**

■ **Conditions for Safe Storage**

- Avoid sudden changes of temperature and high humidity for storage.

■ **Materials for Safe Container**

- Use materials meeting the specific gravity of Ceramic

**9. Exposure Controls/Personal Protection**

**Exposure Prevention**

- Permissible concentration in working environment (reference value)

Ingredient	Chemical Formula	OSHA* PEL* mg/m <sup>3</sup>	ACGIH* TLV* mg/m <sup>3</sup>	Japan Society for Occupational Health Exposure Limit* mg/m <sup>3</sup>
Aluminum oxide	Al <sub>2</sub> O <sub>3</sub>	5 (as Al)	10	N/A

\*OSHA : Occupational Safety & Health Administration U.S. Department

\*PEL : Permissible Exposure Limit

\*ACGIH : American Conference of Governmental Industrial Hygienists Inc.

\*TLV : Threshold Limit Value

\* Exposure Limit : If processing such as polishing and cutting that generates dust, for ingredients with not indicated value, refer to the exposure limit of the Japan Society for Occupational Health

\*N/A : Not Applicable

- Facility measures

Provide local exhaust ventilation so that dusts in the air may not exceed the exposure limits in the above table. It is to be noted that management concentration of the cobalt (and its inorganic compounds) is to be 0.02mg/m<sup>3</sup> in accordance with the working environment assessment standard by Japanese Minister of Health, Labour and Welfare under the paragraph (2), Article 65-2 of the Industrial Safety and Health Act in Japan.

In addition, cobalt (and its inorganic compounds) in the storage or handling, and that to take the necessary action conforming to the Ordinance on Prevention of Hazards due to Specified Chemical Substances.

### Protection Measures

- Respiratory Protection: Dust-proof respirators and respiratory protective equipment are recommended.
- Hand Protection: Protective gloves for dust are recommended.
- Eye/Face Protection: Eye and face protections for dust are recommended.
- Skin/Body Protection: Avoid direct skin contact.  
Clean up deposited dust on clothing, rags, etc. by washing or absorbing with suitable filters but not by whisking off.  
Change the contaminated clothing into clean one.

### Hygiene Measure

Wash skin thoroughly after handling.

## 10. Physical and Chemical Properties

Physical State:	Solid state
Color :	White, Gray, Pink, Green, Brown, Black or Gold solid
Odor:	Odorless
Melting/Freezing Point:	No data available
Boiling or Initial Boiling Point and Boiling Range:	No data available
Flammability, Explosion Limits, Flammability Limit, Flash Point, Spontaneous Ignition Temperature, Resolution Temperature:	No data available
pH:	No data available
Kinematic Viscosity:	No data available
Solubility:	Insoluble
Vapor Pressure:	No data available
Density and/or Relative Density:	3.0 - 11.0
Relative Gas Density:	No data available
Particle Properties:	No data available

## 11. Stability and Reactivity

A grain of dust which occur from Ceramic producing process is very fine and under the specific conditions in which the dusts are mixed with grinding oil with low flash point, it is possible to become pyrophoric. If dusts under very flammable conditions are dispersed in the air, it is possible to explode.

The each metallic ingredients (cobalt, nickel and chromium) for composing the Ceramic has the following information about stability and reactivity under specific conditions.

Stability and reactivity of cobalt alone in below,  
(When cobalt is included as ingredients of Ceramic.)

Reactivity, chemical stability:	Stable to heat and contact with water Ignite spontaneously in air
Hazardous reactions:	It reacts with strong oxidizing agents It reacts violently with oxygen, and it poses a risk of fire or explosion It reacts violently with acid to generate hydrogen
Conditions to avoid:	Contact with incompatible materials
Incompatible materials:	Strong oxidizing agents, acid
Hazardous decomposition products:	By combustion, cobalt oxide and fumes of cobalt oxide may occur

Stability and reactivity of nickel alone in below,  
(When nickel is included as ingredients of Ceramic.)

Reactivity, chemical stability:	It is considered stable in storage and handling in accordance with the laws and regulations
Hazardous reactions:	Metallic nickel is usually stabilized against oxidation by the oxide film, fresh metal surfaces without oxide film is rapidly oxidized by air. Thus, fresh metallic nickel powder, there is a risk of ignition in air.
Conditions to avoid:	No data available
Hazardous decomposition products:	No data available

Stability and reactivity of chromium alone in below,  
(When chromium is included as ingredients of Ceramic.)

Reactivity, chemical stability:	Stable under normal handling conditions
Hazardous reactions:	Reacts violently with strong oxidizing agents such as hydrogen peroxide, it poses a risk of fire or explosion. It reacts with dilute hydrochloric acid and dilute sulfuric acid.
Conditions to avoid:	The alkali or alkaline carbonate is Incompatible. When mixed with air in powder or granular form, there is a possibility of dust explosion.
Incompatible materials:	Strong oxidizing agents, dilute hydrochloric acid, dilute sulfuric acid, alkali, alkali carbonate
Hazardous decomposition products:	During combustion, there can be irritating or toxic fumes and gases.

## 12. Toxicological Information

<b>Acute Toxicity:</b>	No data available on Ceramic
<b>Skin Corrosion/Irritation:</b>	No data available on Ceramic
<b>Serious Eye Damage/Eye Irritation:</b>	No data available on Ceramic
<b>Respiratory or Skin Sensitization:</b>	No data available on Ceramic
<b>Germ Cell Mutagenicity:</b>	No data available on Ceramic
<b>Carcinogenicity:</b>	Group 2A on IARC, as cobalt powder coexisting with tungsten carbide powder. Suspected to be carcinogenic in humans (Ref.1)
<b>Reproductive Toxicity:</b>	No data available on Ceramic
<b>Specific Target Organ Toxicity/Systemic Toxicity: (Single Exposure)</b>	No data available on Ceramic

**Specific Target Organ Toxicity/Systemic Toxicity:** No data available on Ceramic  
**(Repeated Exposure)**  
**Aspiration Hazard:** No data available on Ceramic

**13. Ecological Information**

**Ecotoxicity, Persistence, Degradability, Bioaccumulation, Mobility in soil, Hazardous to the ozone layer**

- No data available on Ceramic

**14. Disposal Considerations**

**Safe and environmentally desirable disposal or recycle method**

- For disposal, conform to the applicable laws regarding industrial wastes such as ‘Waste Disposal and Public Cleansing Law’ and relevant local by laws.

**15. Transport Information**

**International Regulations**

UN Number:	Not applicable
Proper Shipping Name	Not applicable
UN Hazard Class:	Not applicable
Packing Group	Not applicable
Marine Pollutant:	Not applicable

\*When transporting a powder of metallic ingredients (cobalt, nickel) for composing the Ceramic, there is a possibility that it is necessary to take appropriate action in accordance with the relevant provisions established by IMO (International Maritime Organization), ICAO (International Civil Aviation Organization), IATA (International Air Transport Association).

**Domestic Regulations**

Land Regulatory Information	In accordance with the Fire Service Act/ the Road Act
Marine Transportation Information:	In accordance with the Ship Safety Act/ the Act on Port Regulations
Marine Pollutant:	Not applicable
Aviation transportation information :	In accordance with the Civil Aeronautics Act

\*When transporting a powder of metallic ingredients (cobalt, nickel) for composing the Ceramic, there is a possibility that it is necessary to take appropriate action in accordance with the relevant provisions of Ship Safety Law and the Aviation Law.

**Special Safety Measures for Transportation and Transportation Method**

When transporting the dust which occur from Ceramic producing process, make sure that there is no damage or corrosion or leakage of the container, to ensure implementation of the prevention of collapse of cargo.

## 16. Regulatory Information

### Name and Information of Applicable Regulatory

- Law for Pollutant Release and Transfer Register (PRTR)

Silicon Carbide: "Class 1 designated chemical substances", Cabinet Order No.667

Cobalt: "Class 1 designated chemical substances", Cabinet Order No.132

Cobalt oxide: "Class 1 designated chemical substances", Cabinet Order No.132

Nickel: "Class 1 designated chemical substances", Cabinet OrderNo.308

Nickel oxide: "Class 1 designated chemical substances", Cabinet OrderNo.309

Chromium oxide: "Class 1 designated chemical substances", Cabinet OrderNo.87

- Industrial Safety and Health Law, Ordinance on Prevention of Hazards due to Specified Chemical Substances

Aluminum oxide: The substances are defined in the Article 57-2 of the Act, and the aluminum oxide is listed by No.189 in Appended Table9 in the Article 18-2 of the Enforcement Order as "Dangerous or Harmful Substances to be notified their names, etc."

Zirconium oxide: The substances are defined in the Article 57-2 of the Act, and the zirconium oxide is listed by No.313 in Appended Table9 in the Article 18-2 of the Enforcement Order as "Dangerous or Harmful Substances to be notified their names, etc."

Yttrium oxide: The substances are defined in the Article 57-2 of the Act, and the yttrium oxide is listed by No.54 in Appended Table9 in the Article 18-2 of the Enforcement Order as "Dangerous or Harmful Substances to be notified their names, etc."

Chromium oxide: The substances are defined in the Article 57-2 of the Act, and the chromium oxide is listed by No.142 in Appended Table9 in the Article 18-2 of the Enforcement Order as "Dangerous or Harmful Substances to be notified their names, etc."

Silicon carbide: The substances are defined in the Article 57-2 of the Act, and the silicon carbide is listed by No.336 in Appended Table9 in the Article 18-2 of the Enforcement Order as "Dangerous or Harmful Substances to be notified their names, etc."

Cobalt/Cobalt oxide: The substances are defined in the Article 57-2 of the Act, and the cobalt/cobalt oxide is listed by No.172 in Appended Table9 in the Article 18-2 of the Enforcement Order as "Dangerous or Harmful Substances to be notified their names, etc."  
Article 2, Paragraph 1, Items 2 and 5 of Ordinance on Prevention of Hazards due to Specified Chemical Substance, Specified chemical substance class 2, Management class 2.  
When the content of cobalt and cobalt oxide is less than 1%, the Ordinance on Prevention of Hazards due to Specified Chemical Substance is not covered.

Nickel/Nickel oxide: The substances are defined in the Article 57-2 of the Act, and the nickel/nickel oxide is listed by No.418 in Appended Table9 in the Article 18-2 of the Enforcement Order as "Dangerous or Harmful Substances to be notified their names, etc."

## 17. Other Information

### Other Hazardous Information

The following attention should be paid for dust which occur from Ceramic producing process.

- If a large amount of dust containing cobalt is inhaled, blood, heart, thyroid gland, and spleen disorders may result. (Ref.2)
- It is reported that repeated or prolonged contact with cobalt, nickel, nickel oxide, chromium or zirconium oxide may affect skin, respiratory organs, heart, etc. (Ref.3 - 6)
- Inhaling high concentration dust of aluminum oxide may irritate the eyes and upper respiratory tract. (Ref.4)
- Repeated or prolonged inhalation and exposure of aluminum oxide may cause effects on the central nervous system. (Ref.4)
- Zirconium oxide can cause dizziness, increased perspiration, decreased capillary resistance, increased temperature sensation and pain sensation, skin granulomas, irritating symptoms of mild respiratory organs. (Ref.5)
- Magnesium oxide irritates the eyes and nose. Also, inhaling fumes may cause metal heat. (Ref.4)
- For carcinogenicity of metallic ingredients of cemented carbide has the following knowledge.

Cobalt metal	ACGIH	A3: Confirmed animal carcinogen with unknown relevance to humans.
	IARC Japan Society for Occupational Health	2B: Possibly carcinogenic to humans. 2B: The substance has been determined to be possibly carcinogenic to humans (with relatively insufficient evidence).
Nickel metal	ACGIH	A5: Not suspected as a human carcinogen.
	IARC Japan Society for Occupational Health	2B: Possibly carcinogenic to humans. 2B: The substance has been determined to be possibly carcinogenic to humans (with relatively insufficient evidence).
Nickel oxide	ACGIH	A1: Confirmed carcinogenic to humans.
	IARC Japan Society for Occupational Health	1: Proof to be carcinogenic to humans 2B: The substance has been determined to be possibly carcinogenic to humans (with relatively insufficient evidence).
Chromium metal	IARC	3: Not classifiable as to its carcinogenicity to humans.
Ceramic fiber (Whisker)	IARC	2B: Possibly carcinogenic to humans.

\*ACGIH : American Conference of Governmental Industrial Hygienists Inc.

\*IARC : International Agency for Research on Cancer
